Haseko Corporation Receives Highest “A List” Score in the CDP’s Climate Change Evaluation for the First Time

Tokyo, Japan, January 13, 2026--Haseko Corporation (head office: Minato-ku, Tokyo; president: Satoshi Kumano) has achieved the highest score of “A” in the 2025 Climate Change evaluation conducted by the international non-profit organization CDP (head office: London, UK)*1 on December 10, 2025, earning recognition as an “A List” company for the first time.

This “A List” certification reflects the high international regard for Haseko’s initiatives to proactively address climate change as a key business priority and work toward creating a sustainable society.

■ The Haseko Group’s Climate Change Initiatives

In realizing its Corporate Philosophy, “To contribute to society by creating an optimal environment for cities and people,” the Group positions climate change as one of the most important priorities. Based on “The Haseko Group’s Climate Change Response Policy: HASEKO ZERO-Emission” established in 2021, Haseko is advancing the following initiatives on a Group-wide basis.

(Main Initiatives)

- The reduction of greenhouse gas (CO₂) emissions

Formulation of FY2030 CO₂ emissions reduction targets (SBT² certified) (reduction rate of 42% for Scope 1 and 2, and 13% for Scope 3 compared to FY2020), formulation of transition plans to achieve targets, emissions reduction at construction sites and offices (introduction of renewable energy, utilization of low-carbon fuels, electrification trials of heavy machinery, etc.), reduction of emissions related to construction materials (utilizing environmental-friendly H-BA concrete, wood-based materials, etc.), and advancement of energy efficiency in construction and development projects (achieving 100% ZEH-M for self-developed properties, acquiring ZEH-M for contracted construction projects).

(Note) Regarding greenhouse gas emissions reduction rates, renewable energy adoption rates, the number of H-BA concrete projects, and the ZEH-M property ratio, Haseko is advancing these as non-financial KPIs under the “Haseko Group Medium-Term Business Plan (HASEKO Evolution Plan).”

- Adaptive measures for climate change

Hazard-resistant condominiums, reinforcement of heatstroke prevention measures at construction sites, promotion of efficiency in on-site operations through DX, reinforcement of BCP systems in light of increasingly severe weather disasters, etc.

- Proactive Disclosure of Initiative Status

Data disclosures based on the recommendations of the international institution Task Force on Climate-related Financial Disclosures (TCFD) (initial disclosure in 2021, updated as appropriate), responses to CDP questionnaires (initial response in 2022, annual responses thereafter), and data disclosures via the website and press releases, etc.

*1) CDP

Founded in the UK in 2000, CDP is an international non-profit organization that measures, discloses, manages, and shares environmental data for companies and cities. Its annual environmental data disclosures and evaluations are widely recognized as the global standard for corporate environmental data disclosures. CDP sends questionnaires to major global companies regarding their environmental initiatives and related data disclosures. Based on the responses, it evaluates their strategies, efforts, and data disclosure initiatives on an eight-point scale from “A” and “A-” to “D” and “D-.” Companies with outstanding performance are published on the “A List.” In 2025, over 22,100 companies disclosed environmental data through the CDP questionnaire, with 20,000 of them receiving a score.

For the list of companies published by CDP, please see the links below.

*2) SBT

Science Based Targets (SBT)

Greenhouse gas emissions reduction targets consistent with the standard required by the Paris Agreement.
